

Enhanced natural healing in dentistry:

L-PRF

Leuven, Belgium
15–16 December 2022

This interactive two-day course will allow to include the use of L-PRF in all discussed treatments with confidence and following the correct procedures.

Speakers:

Marc Quiryren

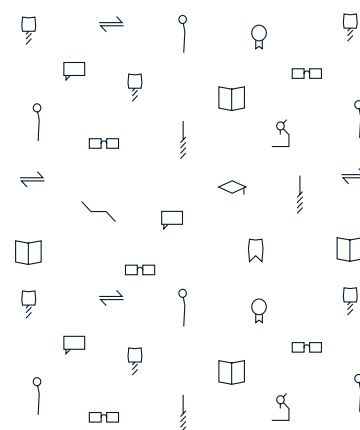

Nelson Pinto

Andy Temmerman

Expert Clinician Course

Thursday 15 December

09.00–10.30	Basic characteristics of L-PRF (composition, antibacterial characteristics, growth factors, ...) and potential applications (intra & extra-oral)
11.00–11.45	Preparation of L-PRF membranes, plugs, exudate (including video)
11.45–12.30	L-PRF membranes, plugs, exudate for tooth extraction/ridge preservation: clinical outcome
13.15–15.00	Hands-on: centrifugation protocol, preparation L-PRF membranes/plugs/exudate & ridge preservation
15.30–16.30	L-PRF membranes, plugs, exudate for sinus floor elevation: clinical outcome
16.30–17.15	Surgical interventions via videos
17.15–18.15	L-PRF for implant coating/gingival plastic surgery/periodontitis: clinical outcome

Friday 16 December

09.00–09.45	Preparation of L-PRF soft/bone block (including video & hands-on)
09.45–10.45	L-PRF soft/bone block for sinus augmentation, sockets with bony dehiscence and horizontal/vertical bone augmentation (part A): clinical outcome
11.15–12.15	L-PRF soft/bone block for sinus augmentation, sockets with bony dehiscence and horizontal/vertical bone augmentation (part B): clinical outcome
13.00–14.30	Hands-on: preparation L-PRF soft/bone block for sinus augmentation and horizontal/vertical bone augmentation
14.30–15.15	L-PRF in immediate implant placement: clinical outcome
15.45–16.15	L-PRF in the treatment of peri-implantitis: clinical outcome
16.15–18.00	Step by step protocol for different applications supported by videos
