4	Post graduate in Oral Surgery	University of Munster	2012

Employment/positions held (include most recent only)		
	PERIOD	INSTITUTION OR EMPLOYER
1	Adjunct Professor	Unicamillus Rome since 2022
2	Adjunct Professor	Istituto stomatologico Toscano since 2017
3	Marienlinik Privat Hospital	Sanitar Director of dentistry since 2024
4		

Clinical activity (Describe main previous and present clinical activity - maximum 100 words)
I have been practicing dentistry for over 20 years. My practice focuses on periodontology and oral surgery. After a long professional experience at the University of Bologna in maxillofacial surgery and periodontology, I collaborated closely with Prof. Khoury for nearly six years. After this extensive experience, I now concentrate on treating patients to restore bone and enable fixed restorations. My understanding of traditional periodontal principles and my expertise in managing bone defects are combined to deliver the best possible outcomes for our patients in my daily practice. This is particularly important today, as more and more patients are taking medications that affect bone remodeling. Thanks to new technologies and tools, I am able to determine the optimal timing for implant loading, especially in these cases.

Teaching activity (Describe main previous and present teaching activity - maximum 100 words)

Different didactic activity:
 Lectures in University for abroad colleagues
 Annual course in oral implantology and advanced implantology
 Speaker in national and international conferences

Research activity (Describe main previous and present research activity - maximum 100 words)

The treatment of bone defects in patients requiring bone augmentation. The focus is primarily on bone augmentation procedures and the treatment of patients with underlying systemic conditions. Understanding and identifying new clinical patterns, and integrating additional data from ISQ scans to determine the optimal timing for implant loading and prevent complications. The use and demonstration of PRGF and its applications, as well as the treatment of periodontal defects and post-treatment follow-up.

Presentations (include most recent only)

Year: 2024 and 2025	Organiser: University of Modena
Title: Cadaver Lab Course	
Year: 2025	Organiser: C. Witt Dental Congress - the 19th Winter Dental Conference
Title: The treatment of bone defects with autogenous bone: from the small defects to the 3D defects	
Year: 2024	Organiser: EAO Congress Hands-on Workshop with Meisinger and W&h
Title: The management of bone defects with autogenous bone	
Year: 2024	Organiser: Dentalpin Davos

Motivation for application

(How & why would the EAO benefit from including you within the Board of Directors? maximum 100 words)

I have been following the EAO Congress for a long time and have met colleagues from different countries. This Academy gives me more opportunities to meet and discuss with other people and create a network not only with the committee but also with all colleagues. I work and live in a region bordering Austria, Germany, and Switzerland, so I also want to build more relationships with members from these countries. My knowledge of three languages—Italian, German, and English—gives me the opportunity to maintain a constant relationship with different European countries.

Recommendation

I hereby expressly recommend Dr. Stefano Trasarti for a position on the EAO Board of Directors. I have known Dr. Trasarti for decades, ever since he spent five years at my clinic successfully completing his advanced training in oral surgery and implantology. Dr. Trasarti is an excellent surgeon with a broad perspective. He is very reliable, collegial, friendly, and always helpful. I am firmly convinced that he can provide strong support to the Board in several aspects.

Best regards

Prof. Dr. F. Khoury

Prof. Dr. Fouad Khoury

Recommendation Letter for Prof. Stefano Trasarti

**To the Election Commission,
European Association for Osseointegration (EAO),**

I am writing to express my strongest and unequivocal recommendation for Professor Stefano Trasarti as a candidate for a position on the Board of the European Association for Osseointegration (EAO).

I have had the privilege of closely observing Professor Trasarti's professional, academic, and clinical contributions to the field of implantology and advanced dental surgery. He represents an exceptional combination of scientific rigor, clinical excellence, and educational leadership. His depth of knowledge in implant dentistry, bone regeneration, and prosthetic-driven treatment planning is of the highest international standard.

Professor Trasarti possesses not only outstanding technical expertise but also a visionary understanding of the future direction of implantology. His ability to integrate evidence-based medicine with practical clinical protocols makes him a highly valuable figure in both academic and clinical environments. He consistently demonstrates a commitment to innovation, precision, and long-term patient outcomes.

In addition to his scientific and clinical qualifications, Professor Trasarti has proven himself to be an excellent educator and mentor. His structured approach to teaching, clarity of communication, and dedication to professional development significantly contribute to raising the standards of dental education across Europe and beyond.

Importantly, Professor Trasarti embodies the core values and mission of the EAO. He has the leadership qualities, integrity, and collaborative mindset required to actively contribute to the growth and strategic development of the association. I am confident that his presence on the EAO Board would not only strengthen its scientific foundation but also support its continued expansion and international influence.

Without any reservation, I can state that Professor Stefano Trasarti is an outstanding and highly deserving candidate for the EAO Board. His expertise, experience, and professional character make him ideally suited for this role, and I strongly believe he will be a valuable asset to the association.

Please do not hesitate to contact me should you require any further information.

Yours sincerely,
MUDr. Amir AmiryManesh, PhD
Associate Professor
Comenius University, Bratislava
